DETAILED ACTION

Specification

1. The amendment filed 10/9/08 and 1/2/08 are objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: "annular ring", "rolled body cap seat", "lower external surface", "lower internal surface", "first demountable pin activated valve" and "second demountable pin activated valve" as in claim 1 or a "sealing pin" as in claim 19. The specification does define a rolled lip 18 but that does not provide support for an "annular ring" or a "rolled body cap seat" and how they are differentiated as such. The drawing of fig. 1 depicts a rolled lip 18, however, there is no clear indication if the "internal surface" is within the lip, itself or the part of the lip within the container 15. Further, the specification clearly defines plunger activated valves. There is absolutely no support for the plungers to be pins and the two expediciencies are clearly not equivalents.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1, 3-6, 9, 11,12, 16,17 and 19-23 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. See paragraph 1 above.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1, 3-6, 9, 11,12, 16,17 and 19-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 9, the recitation appears to be repetitive of claim 1. In claim 11, line 6 is not clear and a comma should be inserted after "seat". In claims 1 and 19, on lines 11 and 2, respectively, "vale" should probably be --valve--.

Response to Arguments

6. Applicant's arguments filed 10/9/08 have been fully considered but they are not persuasive. Applicant has argued that support can be found in the drawings. However, as explained above, a pin is not equivalent to a plunger and the drawings do not support such a change. Further, reference to the rolled lip

18 with different terms also cannot be supported by the drawings without defining the differences in terminology. Also, different interpretations can be made as to the indication of "internal" and "external" without proper support leading to vague and indefiniteness. Therefore, this above terminology does constitute new matter and there is no proper support.
